NEW: Self-Service Kiosks

by straiv & Kiosk Embedded Systems

With modular Kiosk for 24/7 365 Check-in

straiv and Kiosk Embedded Systems present their joint solution: the Self-Service Kiosk. This solution combines the software from straiv with the hardware components from Kiosk Embedded Systems. The Kiosk complements straiv's solution portfolio for the Digital Guest Journey. So that it fits perfectly into any hotel environment, it is available in three versions:

Advantages

✓ More time for personal guest care
✓ 24/7 365 reception possible
✓ No waiting times at reception
✓ Fewer errors thanks to automatic sified data transfer
✓ Relief for staff

1 Indoor Kiosk

Ideal for indoor areas

2 Semi-Outdoor Kiosk

Ideal for covered outdoor areas and vestibules

3 Outdoor Kiosk

Ideal for open outdoor areas

Functional scope at a glance*

Modular kiosk	Check-in- und Check-out	Key Cards	Payment
Can be flexibly adapted to the individual requirements of each hotel and seamlessly integrated into existing systems.	Hotel guests can check in and out independently around the clock, 365 days a year and fill out the Digital Registration Form.	Hotel guests can code their room card themselves and receive it from the dispenser. The Key Card encoding works with all common providers that have an interface to straiv.	All Payment terminals from providers with an existing terminal interface can be seamlessly integrated.
