

With modular Kiosk for 24/7 365 Check-in

strav and Kiosk Embedded Systems present their joint solution: the Self-Service Kiosk. This solution combines the software from strav with the hardware components from Kiosk Embedded Systems. The Kiosk complements strav’s solution portfolio for the Digital Guest Journey. So that it fits perfectly into any hotel environment, it is available in three versions:

Advantages

- ✓ More time for personal guest care
- ✓ 24/7 365 reception possible
- ✓ No waiting times at reception
- ✓ Fewer errors thanks to automatic data transfer
- ✓ Relief for staff

1 Indoor Kiosk

2 Tabletop Kiosk

3 Semi-Outdoor Kiosk

Functional scope at a glance*

Modular kiosk	Check-in- und Check-out	Key Cards	Payment
Can be flexibly adapted to the individual requirements of each hotel and seamlessly integrated into existing systems.	Hotel guests can check in and out independently around the clock, 365 days a year and fill out the Digital Registration Form.	Hotel guests can code their room card themselves and receive it from the dispenser. The Key Card encoding works with all common providers that have an interface to strav.	The payment terminal is possible with our payment partner Adyen and can be seamlessly integrated.
